### **DETAILED ACTION**

Applicant's election with traverse of group II is acknowledged. The traversal is on the ground(s) that search terms would overlap. This is not found persuasive because the search would be burdensome despite some overlap and also because of a different classification search. Search was not too burdensome to include all of claims 2-23 in the claimed invention.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 & 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 10 & 11 fail to particularly point out and distinctly claim the subject matter which applicant regards as the invention because there are no method steps recited.

### ***Claim Rejections - 35 USC § 103***

Art Unit: 1651

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guth et al (EP 0811688).

Guth et al disclose the Rnase P of *Staphylococcus aureus* and suggest methods for inhibiting the enzyme in order to inhibit the bacteria. The reference does not explicitly teach the claimed invention but clearly provides motivation to one of ordinary skill in the art at the time the invention was made to target Rnase P and modulate its activity in order to inhibit bacteria.

Accordingly, the claimed invention was prima facie obvious to one of ordinary

skill in the art at the time the invention was made especially in the absence of evidence to the contrary.
